UNIVERSITY OF HAWAIʻI / RESEARCH OPPORTUNITY 01 / OʻAHU

Hawaiʻi Mesonet Field Technician

Official position: Sea Grant Hawaiʻi Mesonet Technician

Love field science, electronics, and solving technical problems in tough places? This might be your job.

HONOLULU, OʻAHU • FULL-TIME • INTERISLAND FIELDWORK

Help build and maintain a statewide network of research-grade weather stations. Your work keeps reliable weather observations flowing to researchers, forecasters, emergency managers, and communities across Hawaiʻi.

What you'll do

- **Keep stations running.** Install, maintain, calibrate, and repair weather sensors, dataloggers, solar power systems, and cellular communications.
- **Figure out what went wrong.** Use live observations and site visits to diagnose failed sensors, power problems, communications outages, and data gaps.
- **Make the network better.** Maintain station programs, test hardware improvements, and support automated data-quality checks.
- **Make fieldwork happen.** Plan trips, track equipment and calibration records, work with site hosts on access and permits, and train student helpers.

What you bring

- **Education and experience.** A bachelor's degree in atmospheric, environmental, natural-resource or geographic science, engineering, or related field, plus 1–3 years of relevant field experience.
- **Hands-on aptitude.** Comfort with tools, practical repairs, computers, environmental time-series data, and learning instrument programming software.
- **Good field judgment.** Ability to work independently, communicate clearly, and operate a manual-transmission 4WD vehicle on rough roads; valid driver's license required.
- **Especially useful.** Campbell Scientific/CRBasic, sensor wiring, solar/telemetry, coding, graduate training, rugged deployments, or student mentoring.

Field conditions: Frequent interisland and overnight travel, hiking on uneven terrain, lifting up to 50 lb, tower/ladder work up to ~100 ft, helicopter access, and occasional camping.

RCUH limited-term position (up to 12 months). Draft monthly salary: $5,300–$6,500. Continued employment and any future appointment depend on applicable approvals, needs, and funding.

Apply / ask

Apply through rcuh.com/opportunities/job-openings/ when the position is posted. The official listing sets the deadline and requires a cover letter, résumé, references, and degree/transcript documentation. Questions: Dr. Thomas Giambelluca, 808-230-1408.

Recruitment summary of the October 20, 2026 RCUH position draft (Position No. 00051699). The published RCUH announcement governs employment terms and eligibility.
